So far, very helpful feedback. We may need help on getting some current nutrient limits on the towns that you added such as Glendive.

I am making a few changes to the version you sent. I added Appendix 3 which catalogues the Secondary Scores.

Tina:

It looks like you added some text and tables to the S&W Demonstration.
That is fine and will probably improve things, but I just want to
confirm that you did that.

Subject: Comments on the S&W Demonstration

Attached is a revised version of the S&W demonstration for public entities. I know it seems like a lot of comments but many of them are recommendations to insert more detail into the document (or as an appendix). And, I think you've done much of the work already - it's just a matter of including the language in the document. After you've had a chance to look at the comments, why don't we plan to meet to discuss how to proceed and I can answer any questions you have at the time?

In the meantime, I'm going to take a look at expanding the communities with %MHI results to ensure that there is adequate representation of the spectrum of large- medium and lagoon systems. Jeff, I'll be sure to send you the updated Excel file if I make any changes.

Hope these comments are helpful.
Tina
